

Ginny

# Sales Tutorial

PRESENTATION DATE

May 2021

## I. Ginny Multi-Tasker

- A “throwback”, upholstered back. Style up or blend in — Ginny is adaptable and comfortable.
- Mix and match upholstery options across the seat, back and outer backshell to create your own vibe — groovy!
- 300 lbs. weight rating

## II. Finishes

- Ginny Multi-Tasker offers multiple frame choices: with arms, without arms, and any of three finishes.

### III. Stools

- Sit right at any height. Choose between two stool base packages.

#### IV. Ginny Guest

- Ginny was designed to coordinate well with the full range of OM's executive and task seating.
- 300 lbs. weight rating

## V. Finishes

- Simplicity is key to the design with the choice of three frame finishes.

## VI. Upholstery

- Ginny is designed with the ability to match other colors in the environment. The seat, back and back shell can all be specified as desired.

## VII. Ballistic Nylon (choose one or combine)

- When even higher durability is called for, choose the Ballistic Nylon option on the complete front, the lower half of the backrest, and/or the backshell.

Ballistic Nylon  
(complete front)

Ballistic Nylon  
(lower back)

Ballistic Nylon  
(backshell)

### VIII. Bariatric Models

- The Ginny family is expanded to Bariatric models with a 500 lbs. weight rating.
- Built to be strong — As part of our 500 lbs. weight rating testing, Ginny Bariatric has even passed 1,000 lbs. ANSI/BIFMA Drop testing.

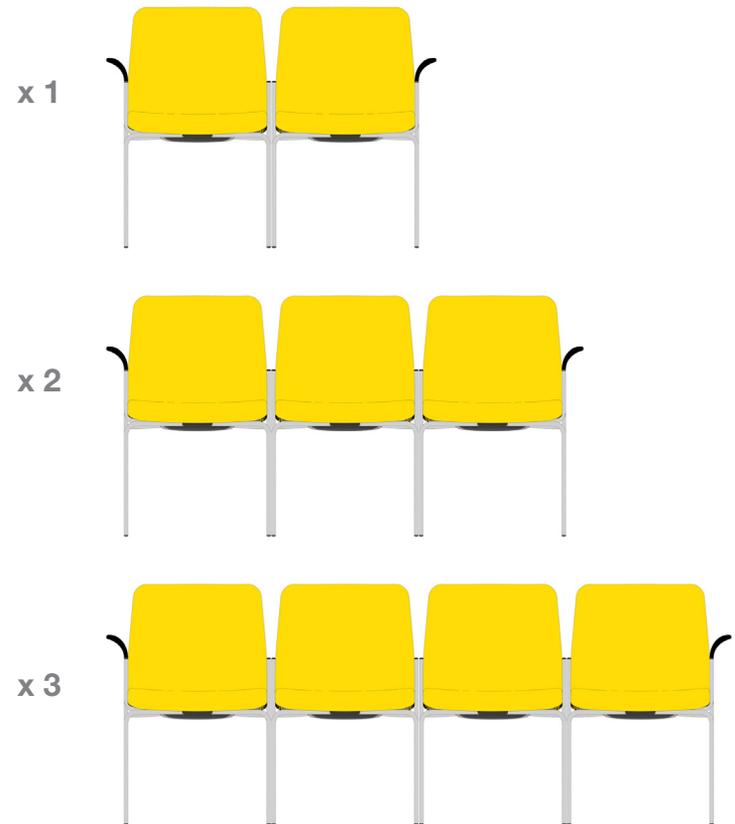

### IX. Ganging

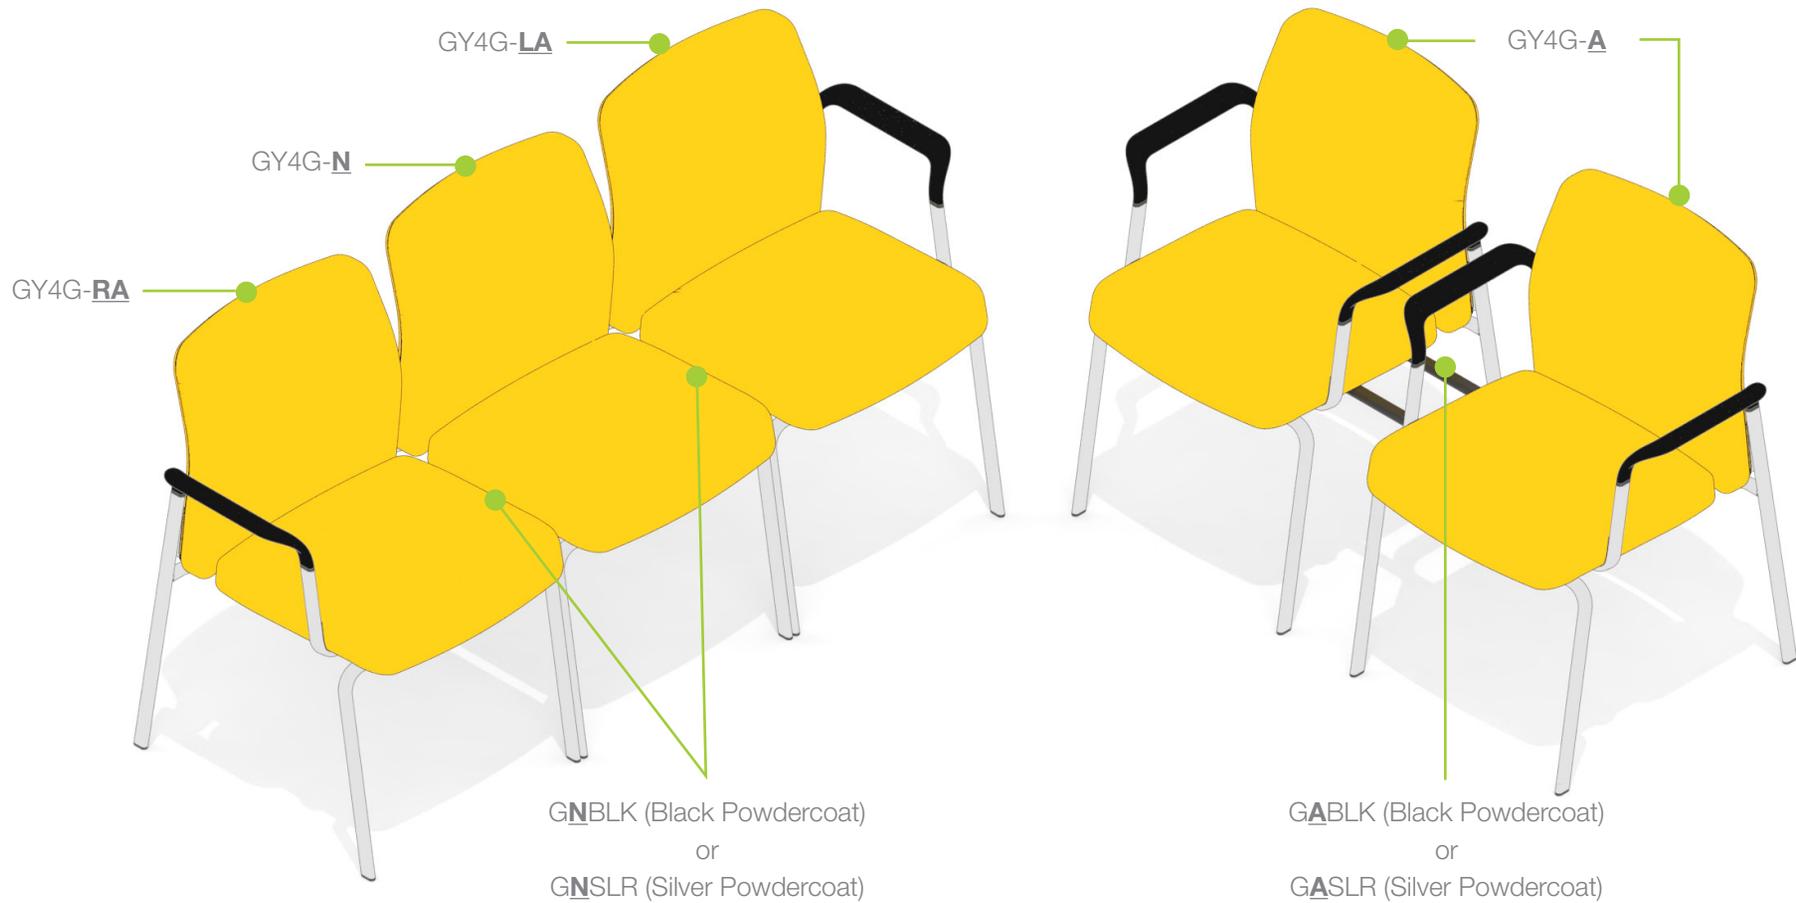

- With the ability to easily gang Ginny's together, multiple configurations are possible.

Ganging Kits  
(needed per row)

## X. Ganging Specifications

- Combining multiple configurations will allow for different layout options. Ganging Kits need to be specified as needed per specific layout.

### XI. Ganging Dimensions (Guest Chair)

- Use these dimensions to determine the estimated space needed for a specific layout.

Arm Ganging 1.75"

GY4G-N

GY4G-LA

GY4G-A

GY4G-A

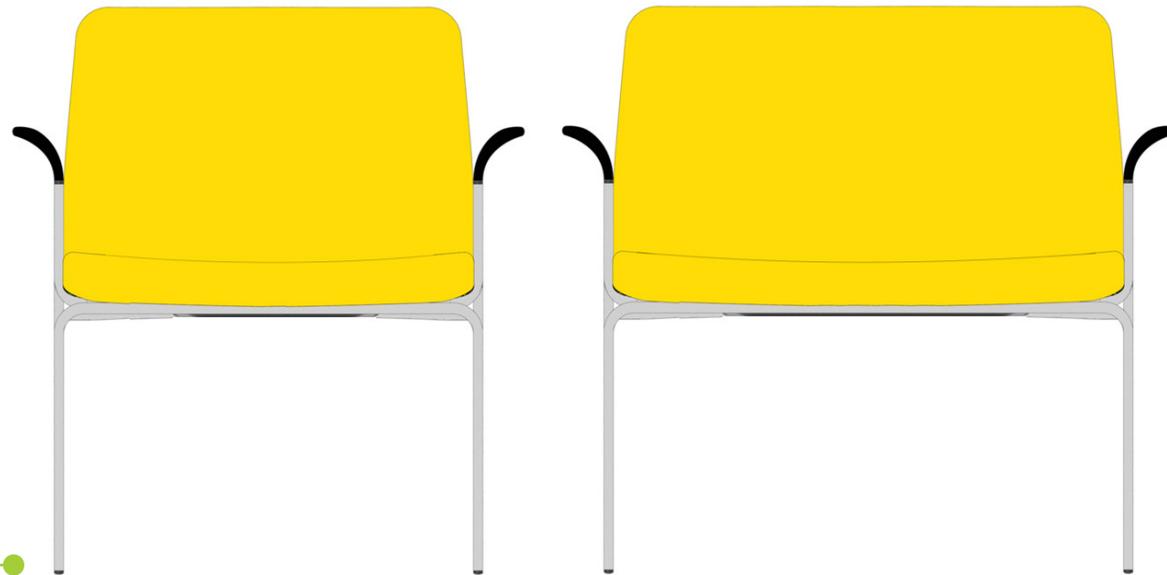

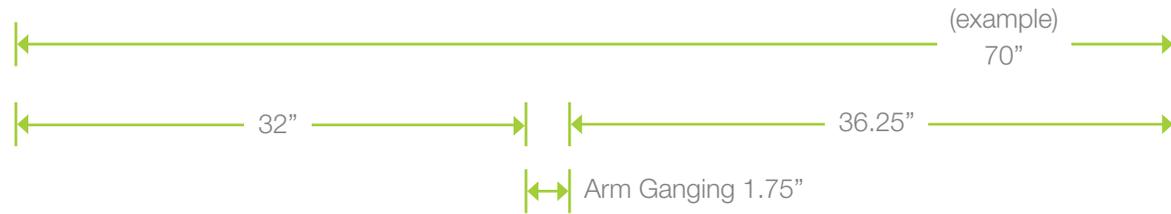

Overall Depth ~24.5"

## XII. Ganging Dimensions (Bariatric Models)

- Use these dimensions to determine the estimated space needed for a specific layout.

GY4B-26

GY4B-30

Overall Depth ~24.5"

## Designed by OM Design Group

OM has been making seating since 1986. Over time, we've gathered valuable institutional knowledge about what makes good chairs great. But, we truly believe that learning never stops. So, we take great pains to actually do what many companies say they do – we listen to customers, take in feedback and opinions from end users, ergonomists, designers, dealers, architects and more; in other words, our influencers. We reject thoughtless copy-cattin, and we pride ourselves on having a diverse product development pipeline that enables us to ultimately find the right designs to bring to market Today, OMDG is comprised of Listeners, Thinkers and Doers representing a balanced mixture of perspectives and approaches... all with the single goal of making your work life, work better!
