Flammability: All fabrics passes California Technical Bulletin 117-2013, Section 1; UFAC Class 1; NFPA 260 Class 1

*This term and any corresponding data refer to typical performance in the tests indicated and should not be construed to imply the behavior of this or any other material under actual fire conditions.

Multiple factors affect fabric durability and appearance retention, including end-use application and proper maintenance. Wyzenbeek results above 100,000 double rubs have not been shown to be a reliable indicator of increased fabric lifespan.

Cleaning Information:
W, WS – Water Solvent: Spot clean with a mild solvent, an upholstery shampoo, or the foam from a mild detergent. When using a solvent or dry cleaning product, follow instructions carefully and clean only in a well-ventilated room. Avoid any product that contains carbon tetrachloride or other toxic materials. With either method, pretest a small area before proceeding. Always rinse promptly with clean water.

BC – Bleach Cleanable: Follow bleach to water dilution ratio. Do not clean/disinfect fabric for longer than 10 minutes using diluted bleach solution. Always rinse promptly with clean water after applying the bleach solution.

Additional Notes:
Individual samples available. Please send requests to samples@omseating.com
Manufacturers will always attempt to ship to a satisfactory commercial match. Because of industry standard dye lot variation, colors may not match exactly.
Specifications are correct at time of printing and are subject to change without notification. Additional specifications may be available by contacting OM.
